## The Implementation of Construction Project Economy in Project Management

Na Chen

Ningxia Construction Engineering Group Co., Ltd. Ningxia Yinchuan 750011

**Abstract:** This paper first analyzes the importance of economic management of construction engineering, and points out the problems existing in the construction engineering economic management, including the backward construction engineering economic management system, the low professional quality level of construction engineering economic management personnel, the problems of capital turnover, the loss of purchasing list and so on. According to these problems, the paper puts forward some solutions, such as optimizing the economic management system of construction engineering, improving the professional quality level of economic management personnel of construction engineering, analyzing the economy of construction products and strengthening the control of material cost. Therefore, in order to adapt to the new market demands, construction enterprises need to reform the traditional engineering economic management mode, optimize the means of engineering economic management, and promote the overall development of Chinese construction engineering industry.

**Keywords:** Construction engineering economy; Engineering management; Optimization measures
