Analysis on the Development Prospect of Building the Fourth-generation Architectural Garden Boutique

Binhui Liang

Guangxi Electromechanical Vocational and Technical College Guangxi Nanning 530007

Abstract: At present, China's social and economic development level is constantly improving, and the people's quality of life is constantly improving, which puts forward higher requirements for urban construction. The garden life of green leaves, red flowers, blue sky and white clouds makes people yearn for unlimited. How to build a garden project into a better, more comfortable and better living environment is the pursuit of every garden project staff. In order to make the garden construction in China develop rapidly, we must pay more attention to its construction quality. Based on this, this paper discusses the preliminary preparation, construction quality control, safe and civilized construction, settlement data and project completion acceptance of the boutique garden project.
